A Table of good Husbandry: By which a Man may know how he parts from his Meanes, and to thriue at the Years end: In what his layings out, or spending by the day, week, and yeare, are measured.

Also by this a Generall may know how to maintaine an Armie, a Merchant to discharge Sea businesse, and a Nobleman to measure his layings out, or expences to profit.

Account from 1 li. to 1000 li. by the Weeke, and not by the Day: For if you count by the Day, 1 li. a Day is 365 li. a Yeare, and 1000 li. a Day is 365000 li. a Yeare, and so of the rest from 1 li. to a 1000.

THis Table, which needs no Deſcription; firſt, readily ſheweth the Intereſt of any Summe from 2 *s.* 6 *d.* to 900 *li.* for any time within a Yeare. Secondly, it is moſt vſefull and expedient for the caſting vp of Intereſt arere, or behind, vpon forfeited Bonds, or accruing vpon ſeuerall payments of money. Thirdly, is right neceſſary as well for the Borrower as the Lender, whereby the one may knew how much Intereſt he ſhould pay, and the other what to receiue; and conſequently neither of them doe, nor ſuffer iniury therein.

The benefit of the enfuing Table here layd open by thefe 3 Queftions following.

1 TO know how much Money with the Intereft, and Intereft vpon Intereft, any fumme of Money will amount vnto being put forth, or forborne for any number, or terme of yeares, non exceeding one and twenty.

2 To know how much any Rent or Annuitie will amount vnto, being forborne, or behind; for any terme or number of yeares.

3 What any Rent or Annuity is worth in ready money, being to continue, or endure, for any terme, or time propofed.

All which are plainely expreft by diuers examples, in the next enfuing leaues.

To conclude, by the fame Table you may value all Money, bargains for Lands, Leafes, Annuities, Penfions, Rents in prefent poffeffion, or in Reuerfion with other Contracts, by the Gaine or Loffe thereof, after the Rate of 8 li. per cent.

The fame Table explaned by example.

THis Table as you fe containes 4 Columnes: The firft towards the left hand is the number of Yeares, for which a fumme of Money is lent or forborne, beginning at 1 and ending at 21 and noted at the top, Yeares.

The fecond Columne fhews how much Money ought to be receiued for 1 li. fet at Intereft, or forborne for any number of yeares vnder 21. And the third fhewes how much muft be receiued for 2 li. and fo of the reft.

The Explanation and Anfwere to the former 3 Queftions.

1 By the firft Queftion is knowne how much Money, with the Intereft, and Intereft vpon Intereft, any fumme

of

of money will amount vnto, being put forth or forborne, for any number, or terme of yeares.

As if it were required how much money ought there to be receiued for 1 *li.* at the ende of 7 Yeares ſet out at Intereſt vpon Intereſt.

Fiſt, I ſeeke out the principall in the head of the Table, to wit, 1 *li.* and ſecondly, the Yeares in the ſide of the Table, ſo right againſt this 7 yeares, and right vnder 1 *li.* I finde 1 *li.* 14 *s.* 2 *d.* and ſo much ought there to be receiued at the ſaide end of 7 yeares.

In like manner, if 3 *li.* had been ſet at Intereſt (for the ſaid terme of 7 yeares. The Intereſt and principall of the ſaid 3 *li.* would amount vnto 5 *li.* 2 *s.* 9 *d.*

Moreouer, if 50 *li.* were put at Intereſt for 12 yeares, according to the former directions, I ſeeke 50 *l.* in the head of the Table, and 12 years in the ſide of the Table, ſo right againſt this 12, and directly vnder 50 *l.* I finde 125 *l.* 28 *s.* and ſo much doth the Intereſt, and principall of 50 *l.* amount vnto, being ſet at intereſt for 12 yeares. And thus of all others: Note that if the principall propoſed bee not found in the head of the Table, take two Numbers there that will make it, and worke as before.

Secondly, by the ſecond Queſtion is known how much any Rent, or annuitie will amount vnto being forborne, or behind, for any terme, or number of yeares.

As if you would know what 7 *l.* Annuitie, Rent, or Debt, being forborne, or behind vnpaid for 5 yeares will amount vnto.

I firſt ſeeke out this principall 7 *l.* in the head of the Table, and vnto this 7 *l.* I add all the ſeuerall ſummes which ſtand againſt the firſt foure yeares, to wit——And it makes in al 41 *li.* 1 *s.* 2 *d.* And ſo much doth 7 *li.* Annuitie, or Rent amount vnto, acounting Intereſt

7 *li.*	0 *s.*	0 *d.*
7	11	2
8	03	3
8	16	3
9	10	5
41 *li.* 1 *s.* 2 *d.*		

vpon

vpon Intereſt being forborne 5 yeares.

Moreouer, if a Rent, or Payment of 40 *li*. be forborne
for 5 yeares, and it were required how much there
ought to be Receiued at the ende of that Terme: vnto
this 40 *li*. I adde all the ſeuerall   40 *li*. 0 *s*. 0 *d*·
ſummes, which are againſt the

firſt foure yeares, to wit	43	04	0
which makes in all 234 *li*. 13 *s*.	46	13	1
4 *d*. and ſo much ought there to	50	07	9
be receiued at the ende of 5 years:	54	08	4

and ſo of any other, &c.

            234   13   4

     Note that if a Rent or Annuitie bee not found in the
head of the Table, as admit it were a Rent of 47 *li*. be-
hinde for 5 yeares.

     Firſt I part it into two parts, which admit 40 and 7.
Secondly, I ſeeke what 40 *li*. annuitie is worth, forborne
5 yeares, which according to the former direction would
bee 234 *li*. 13 *s*. 4 *d*. the worth of that Annuitie. Se-
condly, I ſeeke in the like manner 7 *li*. and find it to be
41 *li*. 1 *s*. 2 *d*. which two ſummes ſet together makes
275 *li*. 14 *s* 6 *d*. and ſo much is 47 *li*. Rent, or annuitie
being forborne 5 yeares, &c.

     3 By the 3 queſtion is knowne what any Rent or An-
nuity is worth in ready money, being to continue, or
endure for any time, or terme propoſed.

     As admit I haue a Rent, or yearely Penſion of 7 *l. per-
Annum*, to endure for 5 yeares, and am deſirous to ſell it
for ready money.

     Firſt, I ſeeke the worth of this yearely Receipt, or Rent
for the ſaid 5 yeares, according to the directions in the
ſecond Queſtion, which I finde to be 41 *li*. 1 *s*. 2 *d*.

                         Secondly

The vſe of the enſuing Table.

Secondly, right againſt the 5 yeares in the Tabel, I ſeeke for this 41 li. 1 s. 2 d. but finding it not, I take the next leſſe ſumme againſt the ſaide 5 yeares, which will be 29 li. 7 s. 8 d. and right ouer it in the head of the Tab.e I ſee 20 li. which I note downe in a voyd place, and alſo the ſayd 29 li. 7 s. 8 d. one againſt another, as here you ſee.

li.	s.	d.		li.	s.	d
41	1	2	li.		s.	d
Sub.29	7	8	20	0	0	
Reſt 11	13	6				
Sub.10	5	7		7	0	0
Reſt 1	7	11		0	18	8
The value in			27	18	8	
ready money						

Thirdly, I Subſtract the ſaid 29 li. 7 s. 8 d. from the atoreſayd 41 li. 1 s 2 d. and there remaines 11 li. 13 s. 6 d. which I ſeek(or the neereſt to it)likewiſe in the Table againſt the former 5 Yeares and find neereſt vnto it 10 li. 5 s. 7 d. and ouer it in the head of the Table 7 li. This 7 li. place downe alſo vnder the 20 li. and againſt the ſaid 10 li. 5 s. 7 d. Now taking this 10 li. 5 s 7 d from the former remainder 11 li. 13 s. 6 d there remaines 1 li. 7 s. 11 d.

Laſtly, I ſeeke this laſt remainder in the Table againſt the former 5 Yeares, and finde the neereſt vnto it 1 li. 9 s. 3 d. and at the head of the Table 1 li. which is greater then the laſt Remainder 1 li. 7 s. 11 d. by 1 s 4 d. Therefore it being taken from the ſaid 1 li. in the head of the Table, there remaines 18 s. 8 d. This being added vnto the former 20 l. and 7 l. makes in all 27 l. 18 s. 4 d. And ſo much is ſuch a Rent, or yearly penſion of 7 l. in ready money worth, to endure for 5 yeares to come.

Moreouer, according to the ſame direction, you ſhall finde that a Leaſe of 40 li. per Annum to endure for 5 yeares, to be ſold preſently for ready money, is worth 159 l. 16 s. 8 d. And ſo of all others in the like kinde.

By the ſame order you may know the increaſe of any ſumme, greater then is in the ſaid Table.

A Table of Weight.

Weight of Wooll.	Weight of Butter and Cheese.	Weight of Vessels and Caskes.
1 Stone 24. *l.*		
1 Tod, 28. *l.*	1 Cloue 8 *l.*	1 Ferkin of 6 *l.* $\frac{1}{2}$
1 Wey, 168 *l.*	1 Wey 256 *l.*	1 Kilderkin 13. *l.*
1 Sacke, 364 *l.*	1 Wey 336 *l.*	1 Barrell 26 *l.*
or 26 Stone.	1 Cloue 8 *l.*	1 load Lead 2100.

Cheese is sold by Stone and hundred.

1 Last of Wooll is 12 Sackes, 24 Weyes, 156 Tods, 312 Stones, 624 Cloues, or 4368 *lb.* weight.

1 Last of Herring containes 1000, and euery 1000 containe ten Hundred.

The vſe of the enſuing Table.

Now for your better vnderſtanding, and more copious vſe of this Table, obſerue the Examples following.

I. *Example*.

A. B. hath an Annuitie of 30. *li per Annum*, to endure for 6 yeeres, *E. F.* hath 26 *l.* cleare Rent, *per Annum* payable for 9 yeares : now if you would know which of them is the better in value, and how much, worke them both ſeuerally, as you are directed in the Rent or Annuity of 1 *l.* and as by the Operation here after ſet downe appeareth. And you ſhal find the 30 *l* Annuity to be worth 138 *l.* 13 *s.* 9. *d. ob* and the 26 *l.* yearely Rent to be worth 162 *l.* 8 *s.* 7 *d.* So that if you deduct the Leſſer from the Greater, it appeares that the Rent is better then the Annuity by 23 *l.* 14 *s.* 9 *d. ob.*

The Termes, with the Act or Commencement dayes in both Vniuerſities, *Oxford* and *Cambridge*.

Hillary Terme beginneth in both, *Ianuary* 14 and endeth at *Oxford*, *April* 1. at *Cambridge* *March* 29

Eaſter Terme begins in both, *April* 19, endes at *Oxford*, *May* 25. at *Cambridge*, *Iuly* 4.

Trinity Terme begins at *Oxford*, *Iune* 7 and ends the 6 of *Iuly* : But may be prorogued, *ad Magiſtrorum bene placitum*.

Michaelmas Terme in both begins, *October* 11 and ends *December* the 16.

Act of Bachilours in both, is the firſt day of Lent.

Act of Maſters in *Oxford*, is *Iuly* the 8. in *Cambridge* *Iuly* the 3.

The

	li.	*s.*	*d.*	*q.*	Summes to
30 *li.* Annuity with the Increase for 6 yeares	220	1	5	3	be disbursed
The summe next in value (which is vnder 100 *li.* Principall) to be substracted from it. —	158	13	8	0	100 *li.*
The Remaine	—61	7	9	2	
The summe next in value (which is vnder 30 *li.* Principall) to bee substracted from it—	47	12	1	0	30 *li.*
The Remaine	—13	15	8	2	
The Summe next in value (which is vnder 8 *li.* Principall to bee substracted from it. —	12	13	9	3	8 *li.*
The Remaine	—1	1	10	3	
The Summe next in value aboue it (which is vnder 1 *l.* Principall.)—	1	11	7	3	
Whereof 2 thirds are	—1	1	1	0	13 *s.* 4 *d.*
The Remaine of 1 *li.* 1 *s.* 10 *d.* 3 *q* the said thirds being substracted. —	0	0	9	3	

For which being about the 41 part of 1 *li* 11 *s.* 7 *d.* 3 *q* you may allow about the sortieth part of 1 *li* viz. **5 *d.* ob.**

Totall, 138 *li.* 13 *s.* 9 *d.* ob.

2 *Example.*

An extent being sued foorth vpon a house and land for 50 *li.* debt, the same is to be raysed by 10 *li. per Annum.* Now the honor of the Premises desiring to buy out this with ready money : the question is, how much money will serue for that purpose.

A Table of compound Intereſt.

To reſolue this Queſtion, conſider, that 50 *li*. will bee payd in 5 yeares by 10 *li. per Annum*. Therefore you are to finde what 10 *li*. a yeare for 5 yeeres is worth in ready money; which if you follow my former direction, will appeare to bee 39 *li*. 18 *s*. 3 *d*. and the ſame is the value of the Extent.

3 *Example*.

Iules Roe taketh a Leaſe for 15 yeares, at 9 *li*. yearely Rent, who after the expiration of 7 yeares, would pay a Fine, and bring downe the Rent to 6 *li. per ann*. for the reſidue of the terme.

To reſolue this queſtion, from 15 yeares abate 7 expired, and the time to come will be 8 yeares. Alſo deduct from the preſent Rent 3 *li*. and there remaineth 6 *li*. Therefore you are to finde what 3 *li*. Rent *per Ann*. for 8 yeares is worth in ready money, which by peruſing my former directions will appeare to be 14 *li*. 9 *s*. 0 *b*.

3 Barly Cornes make an Inch, 12. Inches makes a foote, 3 foot to the yeard, 16 foot and halfe make a Pole or Perch, this Perch in ſome places is 18 foot; in ſome places is 21 foot; Of this 40 in length and 4 in breadth makes an Acre of Land, or Roode, which is 125 paces to the Furlong, euery pace 5 foote: the foot is 4 pames and euery pame 4 fingers breadth; a Fingers breadth is 4 Barly Cornes cloſe together.

A Table of Engliſh miles.

Mile.	Furlong.	Pearch.	Yeard	Foote.	Inch
1	8	40	5½	3	12
1	8	320	1760	5280	63360
	1	40	220	660	7920

The vse of this Table.

First, a man may know how to take money vpon Rebatement after 8 in the hundred.

Secondly, any man that buyes or fels vpon time, may know how much he gaines by taking, and how much he lofeth by giuing of time : and diuers other beneficiall vfes appertaine to the fame Table.

As for Example.

If a Twelue months time be giuen for the payment of 460 *l.* and at the ende of 6 Months, the Creditor defires to haue his money vpon rebatement of 8 *l. per* 100 *l.* how much money muft he receiue.

Firft, I feeke out in the fide of the Table 400 *l.* and the 6 months in the head of the Table, and right aginft the faid 400 *l.* and right vnder 6 monthes, I find 15 *l.* 7 *s.* 8 *d.* 1 *q.* which muft be rebated in the 400 *li.*

Secondly, I feeke in like manner for the rebatement of 60 *l.* for 6 monthes, and find it to bee 2 *l.* 6 *s.* 1 *d.* 3 *q.* which with the former 15 *l.* 7 *s.* 8 *d.* 1 *q.* makes 17 *l.* 13 *s.* 10 *d.* which being taken from the principall fumme, to wit, 460. *l.* there will remaine 442 *l.* 6 *s.* 3 *d.* the fumme of money that ought to be receiued, allowing 6. months rebatement according to 8 *l. per cent.* And thus of any other payment in the like kinde, &c.

A Table

A Table of the Standard of the true making of Woollen cloathes, according to weight and measure.

One Sacke of cleane Woole makes of Sorting Cloaths foure Standard Cloathes.

Euery Cloath weighes 60 *lb*.

The length of euery Cloath 24 yeards of 6 quarters and a halfe broad, or there abouts, with the remedy or allowance of 2 *lb*. weight vpon a Cloath.

Obserue in the weight to be well Scowred, Thicked, Milled, and well Dryed.

Obserue in measure the { Yeard & Inch } within the List.

For breadth and the rest vse this Table, but alwaies obserue the Weight is to be more regarded then the Measure, for the Measure is abused by stretching.

	weig.	Yeards.
Kent, Yorke and *Reading* Cloathes of 6 quarters and a halfe Broade	86 *lb.*	30 & 34
Suffolke, Norfolke, & *Essex* of 7 quarters	80 *lb.*	29 & 32
Worcest. Couent. & *Heref.* of 6 q. & halfe	78 *lb.*	30 & 33
Wilts. Glocest. Oxon. Somer. of 7 quar.	76 *lb.*	29 & 32
Suffolke sorting Cloathes, 6 quarters and a halfe broade	64 *lb.*	23 & 26
All sorting Cloathes of diuers Shires, 6 quarters and a halfe broade	60 *lb.*	24 & 26
Broad Cloath, *Tauntons, Bridgewaters,* and *Dunstars* of 7 quarters.	30 *lb.*	12 & 13
Broad & narrow of *Yorkesh.* of 4: quar.	30 *lb.*	24 & 25
Deuon. Kersies and *Dozens* of 4 quarters	13 *lb.*	12 & 13
Check. Kerseys, Straite and plaine Grayes 4 quarters broad.	24 *lb.*	17 & 18
